ISU PD MONTHLY ACTION UPDATE
1/1 – 1/31/2021

There were fewer reports in January 2021 compared to January of last year, mostly due to classes not starting until January 25 this year and many students still participating in on-line instruction from other locations. One item of note is that the average preliminary BAC for OWIs this month was .171, compared to a level of .141 during January of last year. Also, the average BAC for public intoxication arrests this month was .273, compared to .213 during January of last year. Calls for service were higher for January 2021 compared to January of last year, mostly due to a large increase in the number of extra patrols being conducted and documented in campus buildings and on ISU properties.

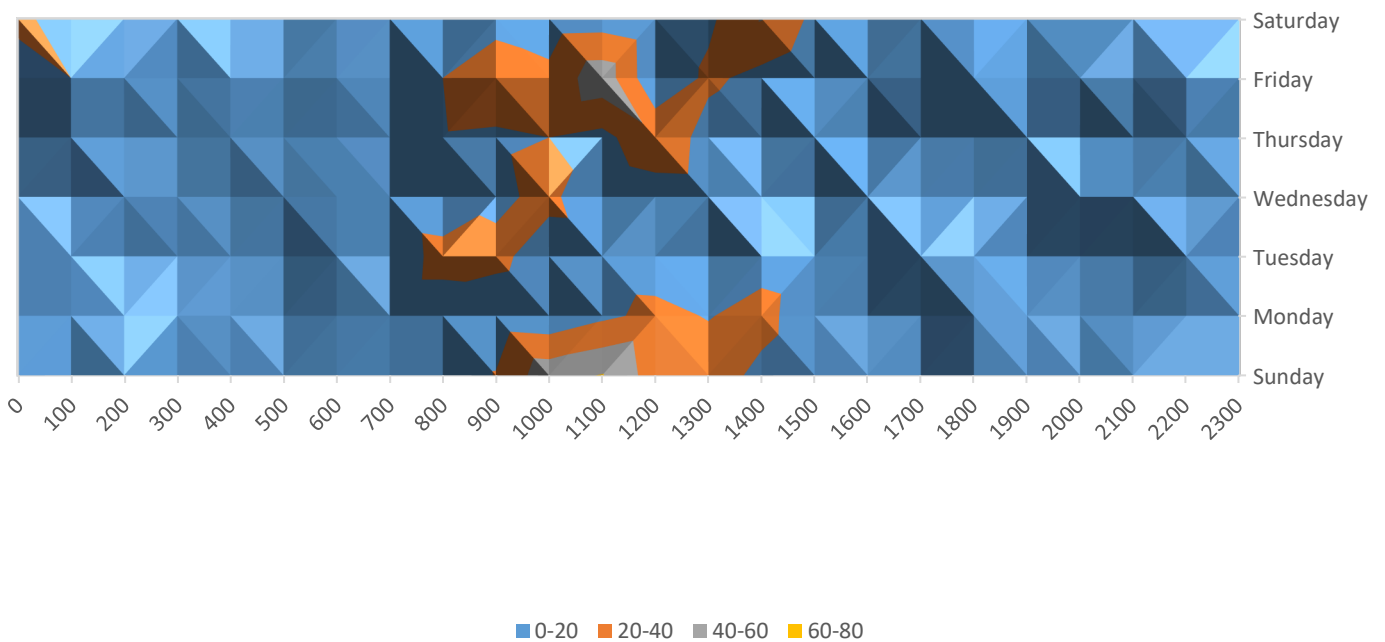

ISU PD MONTHLY ACTION UPDATE
6/1 – 6/30/2021

In June of 2021 there was an increase in both calls for service and reports written over June of 2020. The majority of this increase can be explained by pandemic timing and response. It is important to remember during the summer months there are usually smaller numbers reported which can cause the percentage increases/decreases to seem extreme, and year to date data is more reliable in spotting ongoing trends. Year to date activity includes increases of 40.2% in traffic stops, 33.7% in written reports, and 23.5% in all calls for service

During the second quarter of 2021, there was one incident requiring response to resistance (use of force), 86 arrests, and 4,203 calls for service. Response to resistance incidents represent 1.16% of arrests and 0.02% of calls for service during this time.
